JEENISo Signature

Configuration

Protective Space

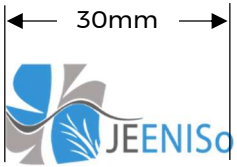

Always maintain the minimum protective space around the logo to maintain visual clarity and to provide maximum impact. The minimum protective space is X. This space is required around all sides of the logo. This applies to positioning around other printed elements, as well as from background field edges, trim and rules.

Minimum Size

Minimum size refers to the smallest size at which the logo may be reproduced to ensure its legibility.

Buffer zone

2.3

Colors

Color is used as one of the key elements to define the look of our Identity. We use a tone-on-tone approach of compatible color combinations. They are neighbors on the color wheel and live harmoniously.

2.4

Colors

Color with Photography

When using color with photography, the use of color should always feel complementary to the image. To achieve this, choose a color from the full palette that is closest to the dominant color in the selected photograph.

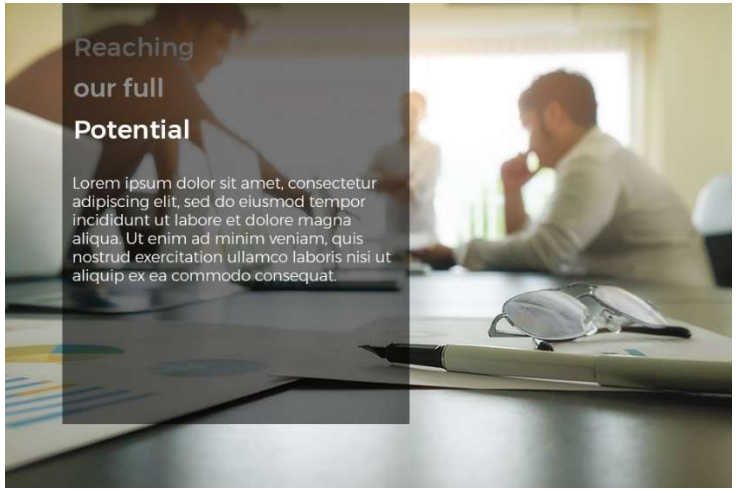

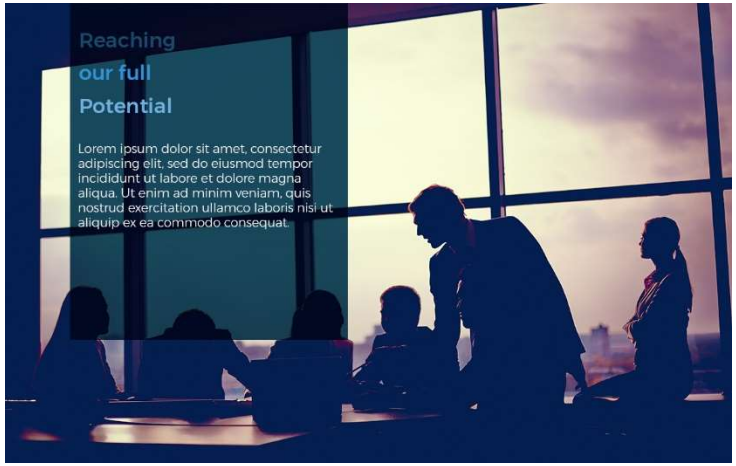

2.5

Colors

Overlay Color

Overlayed color on photography is another way to bring the color palette to life in applications. Use of color should always feel complementary to the image. Choose colors from the full color palette that are closest to the dominant color in the selected photograph.

Typography

3.1

Typography

Typography is a strong extension of our Brand's personality and plays a major role in creating a consistent look for JEENISo across all communications and promotional materials.

MONTSERRAT has been selected for its versatility and legibility for large amounts of body copy. It offers many weights and styles which provide a large amount of design flexibility for all graphic communications. The integrity of the font should be maintained at all times. No vertical or horizontal scaling, no added stroke, etc.
